

.NET (C#) Software Engineer – web and mobile

Position

If you are the eager, ambitious and promising .NET (C#) Software Engineer that we are looking for, you will be working in a young, dynamic environment on challenging, multi-disciplinary projects in a high-tech environment. Your job is to develop web and mobile for internal processes (e.g. MES, CRM, SRM, HR applications) and for our customers. You will be involved in the entire design process. This includes responsibilities such as writing specifications, discussions with our customers, designing, qualification and finally releasing. Technologies used are C#, .NET Framework, WCF, WPF, SQL, ASP.NET, Mobile apps, IOS.

Profile

- MSc. Software Engineering;
- 0-5 years of experience with .NET, JAVA, Android, C#, C++, SQL, AJAX;
- 0-5 years of experience with iOS developer center, iOS Certificates, Objective-C;
- The desire and drive to excel in your field of work.

Your benefits

When you are able to prove that you are the perfect fit for our job, you will be rewarded in many ways: you will get the chance to develop yourself as a person, gain extensive knowledge and develop your career in multiple directions. Besides that, you will -naturally- be offered a market competitive salary and outstanding secondary conditions. After excellent performance your salary will grow incredibly fast and you will even get the opportunity to become a shareholder and all this at an employer that has achieved an average growth of 35% over the last 20 years!

Organization

There are few companies in the world of technology which stand out. As a matter of fact, Prodrive Technologies is one of them. Our company was founded in 1993 by technical professionals from the Eindhoven University of Technology. Since then every year has shown a steep growth rate due to a very successful business concept. Currently the total Prodrive Technologies organization consists of 700 employees (575 FTE), highly skilled and highly motivated and focused on results.

Our organization is based on two main groups, Development and Operations. Development works mainly on a project basis and is responsible for the development of electronic, mechanical and software solutions. For each project a project team with the right skills and knowledge is composed. Operations takes care of the production, assembly, testing and life cycle management of electronic products and systems in a range of 1 to 50.000 per year. The Development and Operations groups are supported by a Sales department and a small Organization Support Group.

Quality is a basic element in our organization and the processes involved. We have structured our processes and working methods in order to guarantee a fixed quality level of products and services. Standardized documentation, reviews and feedback procedures are important elements of the quality system. This system has been fine-tuned to the internal processes and matched with customer requirements.

Prodrive Technologies is located in Son (near Eindhoven) in one of the leading technological regions of Western Europe. It has a solid financial basis, which is the result of good profitability and efficiency in the past years. Despite continuous growth and high investment levels, our company is able to guarantee continuity and commitment to our customers as well as to our employees.
